

ATOMICA

LOG LINE

The vessel of an ancient and powerful energy source known as the Radiance, Atomica a misplaced space princess must use this energy to power her giant robot, Collider. Together they must defend their new home, Earth, from intergalactic invaders while discovering the truth of Atomica's origins.

STONE

Steven Universe meets Gigantor meets Iron Giant.

This series will be a fun and mysterious journey of self-discovery through human and symbiotic relationships. Each 11 minute episode, while packed with plenty of action, will also have moments of sincere emotional character development.

In the tradition of the classic 1980s and 90s "Monster of the Week" style cartoon format, Atomica will rely heavily on fast and furious action with a climactic giant super-robot battle each episode. But there is more to this series than just that. A larger story arc will reveal Atomica's past and eminent destiny that will unfold throughout each season.

SYNOPSIS

Like every coin, our story has two sides. What Atomica has been told, and what she will come to discover.

HEADS:

An unexpected uprising has taken place. Queen Alurus uses her evil alien magic to cast a spell on King Protos. Stealing his power of the Radiance leaving him crumpled and weak. She wields King Protos's own power, the Radiance, to bend her new subjugates to the whims of her own twisted malice. Knowing the terrible fate that awaits Atomica, her uncle Prince Electros takes matters into his own hands to save her, and potentially save the future of Atomia, and avenge his beloved brother.

Constructing a wormhole generator of his own design, Electros sets course for the far reaches of space, and smuggles Atomica away from her mother. Destroying the generator upon their exit, the refugees now hide on a small faraway planet known as Earth.

Queen Alurus will stop at nothing to find them and reclaim her child and the power she possesses.

Or so it is told...

TAILS:

Unknown to Atomica, the truth of these events is actually completely different. Anger fueled by bitterness for his brother, Electros was the impetus for all that has happened. He actually kidnapped Atomica to manipulate and control the Radiance within her and use it to power his evil plans to one day return to Atomia and become its ultimate ruler.

He has twisted the telling of these events to hide the truth from Atomica. He is the reason King Protos is diminished, and the anger we see from Queen Alurus is actually the rage in her obsession to get her beloved daughter back safe where she belongs.

HISTORY & WORLD

There is a right of succession for the leaders of Atomia that is as ancient as the planet itself. To every new generation of Atomians a royal set of twin boys is born. One twin is born with the Radiance, a powerful form of energy that fuels the planet and its civilization. The other twin is not. The current generation is led by King Protos, vessel of the Radiance. Prince Electros, while still a highly brilliant and influential leader, does not possess this power.

Unable to deny his own heart, King Protos stepped outside of tradition and took for a bride an offworlder, Queen

Alurus. The queen of Alturon, a matriarchal society of mighty warriors. In doing so Protos broke the cycle. Instead of two twin boys, their union and the mixing of their alien cell structures produced a set of twins consisting of one boy and one girl. A son named Isomer, and a daughter Atomica. Atomica inherited the Radiance from her father. While unsure of this new precedence, the people of Atomia rejoiced and embraced the coming of their soon-to-be leaders, and felt that their future shone brighter than ever before.

CHARACTERS

ATOMICA

A princess and heir to the throne on her home planet of Atomia, Atomica has never actually been there. Taken as a small child as a refugee on Earth, she struggles to find her way, herself, and her true purpose. Atomica is a living vessel that contains the Radiance, a super powerful energy that fuels her home world. On Earth, aided by her Uncle Professor Electros, she uses her inner energy to power Earth's mightiest defender. A giant robot named Collider, who she lovingly calls Clyde.

COLLIDER

Created by the brilliant Professor Electros, Collider is the pinnacle of Atomian technology. Powered by Atomica's own energy, this giant robot has become Earth's mightiest defender. Collider has the ability to generate energy weapons in any form that suit any battle needs that may arise. Through their energy link, Collider is a perfect extension of Atomica's every thought and move. While he appears to just be a piloted automaton it is strange how he seems to emote towards Atomica. An aspect that the Professor sees as a glitch, and is constantly trying to fix. But, it could be argued that this "glitch" is actually the reason Collider and Atomica are able to overcome the most powerful of adversaries.

ROUGHLY
TO SCALE

NUTRINA

A child size somewhat sentient robot the Professor created to help in the care of and rearing of Atomica. Atomica and Nutrina have a friendly and fun relationship as she serves as the Princess's playmate, but she also has a parent like quality. Constantly coddling and doting over Atomica. Nutrina also serves as the mechanical interface between Atomica and Collider and is an integral part of their symbiosis.

PROFESSOR ELECTROS

Among the most brilliant and accomplished scientists back on his home world, Electros uses his intellect and skills to make Earth a better and safer place. Electros is actually the crowned prince of Atomia. Twin Brother to King Protos, and uncle to Atomica. He is now Atomica's primary guardian. Not only rearing the young girl and helping her to make sense of their strange new home, he has made it his sole purpose to protect her from the enemies who seek to obtain the Radiance inside her. While he truly loves and cares for his niece, and the well being of Earth, he is a very guarded and mysterious man. And his true intentions are not always clear.

QUEEN ALURUS

Once the strongest and most cunning of warriors, Alurus earned the throne of Alturon by proving her worth in battle. When the Alturon conquest lead them to the planet of Atomia the invasion was called off. The noble King of Atomia himself came as his planet's ambassador to seek peace with the Alturons. Never before encountering such a kind and just ruler, Alurus found Protos to be her perfect match. It was love at first site. The rest is history.

KING PROTOS

A wise, just, and mighty king, Protos rules over the world of Atomia with a gentle hand, and a caring heart. Protos is the current vessel of the Radiance, and lends this energy to power his kingdom. He is a great leader who loves his people. There are few he loves more. Those few are his wife, brother, and his two children, Atomica and Isomer.

PRINCE ISOMER

While not the vessel of Radiance, Prince Isomer's deeds do not go without great merit. He is one of Atomias greatest heroes. Like his Mother, he is the fiercest of warriors, and the most able pilot to ever helm a space fighter. While quick to challenge any to oppose him, this son of Protos is not without compassion. His driving force and sole ambition is the rescue of his beloved twin sister, Atomica.

TERRORNAUTS

The giant armored space beasts that travel through an unstable wormhole to terrorize Earth. These invaders are the relentless monsters hell bent on destruction that Professor Electros has warned the leaders of Earth about. And is why the good Professor created Collider. The truth is, these abominations are the unfortunate byproduct of an unstable wormhole from Atomia. These poor soldiers have been sent to search out and rescue Atomica by her own mother. Due to the Atomians inability to recreate Electros's wormhole generator, their cellular structures are mutated into pure monstrosity, and their minds stripped of all reason and logic.

SEASON 1

EPISODE IDEAS

EPISODE 1 - NEW HOME Through a series of time jumps from past to present, we learn of Atomica and Electros's arrival on Earth, the decision to help Earth defend itself, the construction of the city defense system and the giant super robot Collider, and ultimately the training of Atomica to power and pilot her giant super robot. Over this span of time the evil Queen Alurus has located Earth, and Atomica. She sends the first Terronaut to claim our hero, but the marauder is met head on by Earth's new mighty defender, Collider.

EPISODE 2 - BEDTIME STORIES After an exhausting victory over another Terronaut, Atomica asks her Uncle Electros to tell her favorite story recounting the events that led to their exodus from Atomia. The tale tells of the rise of Queen Alurus, the fall of Atomica's father, King Protos and the overthrow of the great capitol city of Nucladia. Culminating in the daring escape of Professor Electros with the infant princess, Atomica. But is Electros's telling of the story the way it really happened?

EPISODE 3 - THE RADIANCE As Queen Alurus frantically increases her efforts to send Terronauts to claim Atomica, and the monster incursions become more frequent on Earth, Atomica is left confused as to why they are after her. Electros explains the history and noble lineage of the Atomian Royal Family, and the uniqueness and importance of the energy source called The Radiance. Of which Atomica is one of the few gifted with this great power.

EPISODE 4 - SLEEPOVER Collider has become quite the pop culture phenomenon. Two Collider super fans from school convince Atomica to have them over for a sleepover in an effort to get closer to the object of their infatuation. The sleepover is all good and fun until they convince Atomica to let them inside Collider. Of course a Terronaut appears and Atomica must fight, but with the girls in tow. The girls end up helping Atomica defeat the monster, and in the end realize Atomica is the one deserving of their hero worship.

EPISODE 5 - CONTAINMENT Atomica is being picked on at school because of the containment suit Uncle Electros requires her to wear, and she is quite fed up with it. During a daunting Terronaut encounter, Collider's cockpit bubble is smashed. Suddenly realizing she does not need the containment, Atomica sets forth a giant blast of Radiance directly from herself, destroying her adversary. While Atomica is overjoyed with the discovery, Electros seems most displeased. Why was he draining Radiance reserves from the suit, and why is he now draining it from Collider?

SEASON 1

EPISODE IDEAS

EPISODE 6 - OLD SCARS For the first time, a Terronaut attempts to speak to Atomica. Pleading with her to stop fighting. Confused and afraid, she finishes the creature. In the aftermath of the battle, among the remains, Electros finds a clue to the origin of these terrible beasts. The clue, an Atomian military badge, also triggers a memory for the Professor. Exposing old scars between he and his brother, King Protos. Electros and Atomica are both shocked to learn that the Terronauts are actually soldiers from their home planet.

EPISODE 7 - BUG IN A JAR Catching insects for science class gives Atomica the idea to try to capture a Terronaut. Atomica convinces Electros to use the Radiance to power the construction of containment units and to power experiments to reverse the terrible transformation of Atomians into abominations. The first attempt with the new tech fails, and Atomica must use Radiance directly from her own hands to detain a Terronaut. And, it would appear in doing so, that the raw Radiance has an effect on the beast neither she nor Electros had expected.

EPISODE - 8 GIRL TIME Electros can't make it to pick up Atomica from school, so he arranges for her to go home with a friend and her Mom. The Mother/Daughter duo end up treating Atomica to some "Girl Time" at the mall. Just when they are having a blast, and Atomica experiences first hand the joy of a Mother/Daughter relationship, a Terronaut rips the roof right off the mall. Atomica must defend her friends and stop the monster! All in time for dinner.

EPISODE 9 - WE MUST FIGHT! Atomica and Electros have developed new tech that allows Collider to focus Atomica's Radiance directly from her. Making rounding up and capturing Terronauts safer and easier. Electros wants answers now, and in interrogating these captives, begins to show a darker side. When an imprisoned Terronaut breaks free in the lab, Atomica discovers that with Radiance directly from her own hand, she can heal these mutated Atomians, and reverse the terrible mutations caused by the faulty wormhole.

EPISODE 10 - GLIMPSE OF TRUTH Queen Alurus and Atomia's resources are pushed to the limit, but so is Collider. Defeated by a mighty Terronaut, Collider is down. Atomica must rely on her own Radiance to win the day. Transformed from Terronaut back to Atomian Soldier, he tells Atomica that the evil queen is her mother. A new light is shed on Alurus and the situation on Atomia. While the light on Electros and his true intentions goes very dark, leaving the fate of Atomica shrouded in mystery.
